Cevdet Batuhan Isik

(617)-595-2314 | Boston, MA | isik.c@northeastern.edu | batuhanisik751@github.com | LinkedIn: linkedin.com/in/batuhan-isik32

Education

Northeastern University — Boston, MA
Khoury College of Computer Sciences — *September 2022 – Present*
Candidate for a B.S. in Computer Science — Expected December 2026
Leadership Experience: Co-President of Turkish Student Association (TSA) at Northeastern University, Delta Kappa Epsilon Fraternity

Experience

Burnes Center for Social Change (InnovateUS) — January 2026 – June 2026
AI for Impact Fellow — *Boston, MA*

- Architected generative AI products for **InnovateUS**, a national learning platform serving **200,000+** public-sector professionals across U.S. government agencies.
- Built a multi-agent **RAG** coaching tool (React, Express, Weaviate, OpenAI, AWS Lambda/CDK) that routes user turns across five specialized prompt agents over a cited public-engagement knowledge base.
- Conducted qualitative and quantitative research to define problems, evaluate impact, and guide evidence-based solution design.
- Managed the AI product development lifecycle from concept to deployment and collaborated with product managers and communicating outcomes to technical and non-technical audiences.

OBSS Technology — June 2025 – August 2025
Deep Learning Intern — *Istanbul, Turkey*

- Engineered advanced inpainting workflows in **ComfyUI** to automatically remove objects from images and regenerate realistic background regions using diffusion-based models.
- Formulated an AI realism evaluation algorithm in **FiftyOne**, leveraging **LPIPS** and **SSIM** to quantitatively assess visual fidelity between AI-generated and real images, enabling objective benchmarking of generative model outputs.

Northeastern University — July 2024 – December 2024
Skillstack Administrator Support Co-op — *Boston, MA*

- Audited and Optimized **B2B Canvas LMS** and ensured user reporting and sub-account structure within the platform.
- Refined the support process and improved documentation clarity for the **B2B Canvas** platform and **Canvas Credentials**.
- Prototyped a Salesforce Hackathon prototype using **Salesforce Flow Builder** and **Einstein Copilot** with AI-driven automation.

Projects

Quantifying Happiness | *Swift, Python, HealthKit, Machine Learning* — December 2025

- Modeled a personalized AI system modeling relationships between **9 health metrics** and user satisfaction to generate daily, data-driven lifestyle recommendations.
- Applied **Simulated Annealing** with **KNN regression**, improving predicted satisfaction from **5.0** to **8.98** in **1,000** iterations and demonstrating convergence toward global optima.
- Tested the system using a synthetic dataset of **100 daily records**, validating end-to-end performance across scaling, prediction, and optimization components.
- Delivered an iOS app using **SwiftUI** integrated with **HealthKit**, enabling users to visualize trends, input satisfaction scores, and receive personalized recommendations.

Yelp-Based Restaurant Retrieval System | *Python, FAISS, SBERT* — April 2025

- Constructed a location-aware restaurant search system using Yelp's **50,000+** reviews and business metadata.
- Implemented dense retrieval using **SBERT + FAISS**, and ranked results by review relevance and user proximity.
- Enhanced query accuracy with ground-truth labels and evaluated with **MAP@100** and custom relevance tiers.

Salesforce Hackathon | *Salesforce* — November 2024

- Completed **56 hours of Salesforce Admin Training** and developed a customized Salesforce solution to automate business workflows using **Salesforce Flow Builder**.
- Integrated **Einstein Copilot** actions to streamline guest check-in processes and enhanced efficiency through **AI-driven automation**.
- Delivered a functional prototype demonstrating innovative problem-solving and real-world use of Salesforce tools.

Reversi | *Java* — December 2023

- Programmed a complete **Java implementation of Reversi** with game logic and state management.
- Designed an **interactive GUI** with a custom hexagonal board, incorporating real-time visual updates and mouse/keyboard controls for smooth user gameplay.

Technical Skills

Languages: Python, TypeScript, JavaScript, Swift, Java, C, SQL, R, CSS/HTML
ML/AI/Backend: PyTorch, NumPy, Pandas, scikit-learn, SBERT, FAISS, KNN, Simulated Annealing, LPIPS, Node.js, Express
Tools: Git, VSCode, Figma, ComfyUI, FiftyOne, Salesforce Flow Builder, Einstein Copilot, HealthKit, SwiftUI, RStudio
Cloud/DB/LLMs: AWS (EC2, S3, Lambda, IAM, EBS, ECS, RDS), Supabase, ChatGPT, Claude, Google Gemini
